March – July, 2022

Back end, Ghadeer Future Accelerator

Main languages:

- Node js

January –July, 2022

Front end, Knowledge Academy (online)

Main languages:

- HTML/HTML5
- CSS2/CSS3
- Bootstrap
- Javascript
- JQuery
- Angular

## Projects

January – May, 2021

**ARShop :**

**My graduation project is :**

A website and mobile application to sell products for women related to skin, body, hair and more ... I used bootstrap in Front-End, OOP PHP in Back-End, and Mysqli in database. I treated with visual studio code and PHPMyAdmin.

**My website functions:**

Login, logout, register. Searching for a specific product. Classification of products based on price. User can see the product details, evaluate it and write his opinion on the product. User can add products to wishlist. The user can add products to the shopping cart with the quantity he wants.

User can create an order. User can use the available coupons. User has orders page in his profile which he can see his order and it's status.

## Languages

- Arabic (Native)
- English (very good)
