EXPERIENCE

Hebron West Bank, Palestine
Sep 2021 - May 2022

Mobile Developer Flutter/ website Flutter web

Palestine Polytechnic University

I worked on my graduation project entitled Drone Emergency Assistance System, where the project aims to speed up the process of reporting an accident, where an accident is detected by sensing the phones vibration through the accelerometer sensor in the phone and showing a message to alert and the occurrence of the notification. Work was done on a web server to clear the reports, and the application was linked With the smart watch to know the initial health information of the user of the application, as the firebase was dealt with in the back-end

Online
Feb 2021 - Apr 2021

Next Gen Coders Network

Stevens Initiative

The NGCN program is supported by the Stevens Initiative, I joined this program within the student exchange program at Palestine Polytechnic University, which aims to exchange cultures and experiences between students from different universities in different countries, where work was done to solve programming questions in the form of groups and a website was created at the end of the program
