## ABOUT ME

I'm a Software Developer having good Oral/ Communication skills, good software experience, a good team player, a hard worker, a self-motivated, well-organized, creative problem solver, in addition that I pay attention to details.

## EXPERIENCE

### Database and Appian Software Developer | Experts Turnkey Solutions

JUNE 2022 – PRESENT

Built an Appian application consisting of a company HR system for departments and employees, it can add, update, delete, and view every department or employee in detail (CRUD application), in addition to a system to move an employee from one department to another.

### Back-End Training | Knowledge Academy

FEB – MAY 2022

Back-end development training, where we've completed PHP and database, and worked on different PHP native projects, which are a Facebook sign-up page, landing website, and Architecture company projects using a template besides PHP native, SQL, bootstrap, and font awesome.

### Back-End Training | MTIT

FEB – APRIL 2021

Built a mailing system project using a template besides HTML, CSS, PHP language, and LARAVEL framework.

## PROJECTS

- **Company Site Project:** Built an Appian application consists of a company system for departments and employees, it can add, update, delete, and view every department or employee in detail (CRUD application), in addition to a system to move an employee from one department to another.
- **Mailing System Project:** Built a website with multiple user interface pages one enables the user to add a new mail by saving the mail's data (such as its type, weight, quantity, etc.), one enables the user to view all the mails in the system (which can add a new mail, delete mail, or update mail information) in which enables the user to track the mail from the moment it is sent until it is delivered to its destination , one for adding a new payment method if it's not listed among the available payment methods, and another one through which a new user can be added to the system to convert the mailing process to an electronic process using admin-theme.
- **Burqin Municipality System Project:** Analyzing and studying the Burqin municipality system and presenting a plan for a digital customer service system.
